

PCEP Flashcards – Quick Recall

Card 1: What creates code blocks in Python?

Answer: Indentation.

Card 2: Difference between / and // ?

Answer: / is float division; // is floor (integer) division.

Card 3: How to read a number from input?

Answer: `n = int(input())` # may raise ValueError

Card 4: List vs Tuple?

Answer: List is mutable; tuple is immutable.

Card 5: Safe dictionary lookup?

Answer: `d.get(key, default)`.

Card 6: Break vs Continue?

Answer: break exits loop; continue skips to next iteration.

Card 7: for-else semantics?

Answer: else runs only if the loop wasn't broken.

Card 8: Common exceptions?

Answer: ZeroDivisionError, ValueError, TypeError, IndexError, KeyError.

Card 9: Define function with default?

Answer: `def f(a, b=2): return a+b`

Card 10: Variable scope?

Answer: Names inside function are local by default.

Card 11: String slicing example

Answer: `"python"[1:5:2] -> "yt"`

Card 12: Truthiness basics

Answer: Falsey: 0, 0.0, "", [], {}, None

Card 13: Range step

Answer: `range(start, stop, step)` – stop is exclusive.

Card 14: Dictionary iteration

Answer: `for k, v in d.items(): ...`

Card 15: String immutability

Answer: Methods return new strings, original unchanged.

Card 16: List common ops

Answer: append, insert, pop, remove, sort, reverse, extend

Card 17: len() usage

Answer: len on strings, lists, tuples, dicts (counts keys).

Card 18: Membership

Answer: `x in seq/dict` (checks keys in dict).

Card 19: try/except template

Answer: `try: ... except SomeError: ... else: ... finally: ...`

Card 20: Multiple assignment

Answer: `a, b = b, a`
